PCT

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY (Chapter II of the Patent Cooperation Treaty)

(PCT Article 36 and Rule 70)

1	_	file reference 003 PCT	FOR FURTHER A	FURTHER ACTION See Form PCT/IPEA/416						
International application No.			International filing d	ate (day/month/year)	Priority date (day/month/year)					
PCT/EP2004/007308			05.07.200	14	10.07.2003					
Internati	International Patent Classification (IPC) or national classification and IPC									
B03C1/28										
Applicant CHEMAGEN BIOPOLYMER-TECHNOLOGIE AG										
1.	 This report is the international preliminary examination report, established by this International Preliminary Examining Authority under Article 35 and transmitted to the applicant according to Article 36. 									
2.	This REPOR	RT consists of a total	of 4	sheets, including	g this cover sheet.					
3.	This report i	s also accompanied	y ANNEXES, comprising	:						
	а. 🔲	sent to the applicant	and to the International B	ureau) a total of	sheets, as follows:					
	sheets of the description, claims and/or drawings which have been amended and are the basis for this report and/or sheets containing rectifications authorized by this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions).									
	sheets which supersede earlier sheets, but which this Authority considers contain an amendment that goes beyond the disclosure in the international application as filed, as indicated in item 4 of Box No. I and the Supplemental Box.									
	b. (sent to the International Bureau only) a total of (indicate type and number of electronic carrier(s))									
	, containing a sequence listing and/or tables									
	related thereto, in computer readable form only, as indicated in the Supplemental Box Relating to Sequence Listing (see Section 802 of the Administrative Instructions).									
4.	This report	contains indications i	elating to the following ite	ms:						
	Box	No. I Basis o	f the report							
	Вох	No. II Priority								
	Вох	No. III Non-es	ablishment of opinion with	h regard to novelty, invent	ive step and industrial applicability					
	Box	No. IV Lack o	unity of invention							
	Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement									
	Box	No. VI Certain	documents cited							
į	Вох	No. VII Certain	defects in the international	l application						
	Box No. VIII Certain observations on the international application									
Date of submission of the demand				Date of completion of thi	is report					
Name and mailing address of the IPEA/EP				Authorized officer

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.
PCT/EP2004/007308

Box	No. V			ticle 35(2) with regard to novelty, inventive step or industrial applicability; porting such statement	
1.	Statement				
	Novelty ((N)	Claims	1-27	YES
			Claims		NO
	Inventive	e step (IS)	Claims	1-27	YES
			Claims		NO
	Industria	l applicability (IA)	Claims	1-27	YES
			Claims		NO

- 2. Citations and explanations (Rule 70.7)
 - 1. This report refers to the following document:

D1: DE 100 57 396 C (KARLSRUHE FORSCHZENT), 4 April 2002 (2002-04-04)

2. Document D1, which is considered to be the closest prior art, discloses a device for separating magnetic or magnetisable particles from a liquid.

The subject matter of independent claim 1 differs in that the movable magnets are at least partially surrounded by a material that screens out the magnetic field.

- 2.1 The subject matter of claim 1 is therefore novel (PCT Article 33(2)). The problem addressed by the present invention can be seen as that of using the device for high-throughput processes.
- 2.2 The solution proposed in claim 1 of the application involves an inventive step (PCT Article 33(3)) because it is not suggested by the prior art.

International application No.
PCT/EP2004/007308

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

- 2.3 Claims 2 to 23 are dependent on claim 1 and therefore also meet the PCT requirements in respect of novelty and inventive step.
- 3. Document D1, which is considered to be the closest prior art, discloses a method for separating a target substance from a mixture of substances in liquid form.

The subject matter of independent claim 24 differs in that the magnetic field is switched on and off by changing the position of a permanent magnet located in or on a magnetic circuit.

- 4.1 The subject matter of claim 24 is therefore novel (PCT Article 33(2)). The problem addressed by the present invention can be seen as that of using the method for high-throughput processes.
- 4.2 The solution proposed in claim 24 of the application involves an inventive step (PCT Article 33(3)) because it is not suggested by the prior art.
- 4.3 Claims 25 to 27 are dependent on claim 24 and therefore also meet the PCT requirements in respect of novelty and inventive step.
- 5. The application relates to a device and method for separating magnetic or magnetisable particles. Devices and methods of this type are clearly industrially applicable (PCT Article 33(4)).
